

WHEN YOU PLANT YOUR SPROUT PENCILS, PLEASE FOLLOW THE STEPS BELOW TO GET THE BEST RESULT:

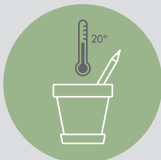

1. Use a pot with a drainage hole in the bottom.
Place it on a saucer and fill with good potting soil.

2. Water the soil so it's moist but not soggy.

3. Plant the pencil at an angle and not too deep.
The soil should just cover the seed capsule.

4. Place the pot in natural light but avoid direct sunlight.
A temperature of 20°C is ideal.

5. Water regularly in the saucer. The first shoots should appear
between one and four weeks later.
